## STAIR MODELS

# WATER TREATMENT

## Filter Connections

Stainless steel connections for external filtration systems provide a durable and reliable solution for integrating a sand filter into your hot tub, ensuring optimal water cleanliness and longevity.

## Filter For Sand Filtration

The sand filter system keeps hot tub water clean and clear. It can be filled with special filtration sand or cotton balls for efficient water purification. The system includes a dedicated water pump and a large particle filter for optimal performance.

## UV-C Lamp ( Blue Lagoon)

We use Blue Lagoon UV lamps, the world's leading brand, in our hot tubs. These UV-C lamps are specially designed to withstand high water temperatures, ensuring efficient and safe water disinfection. The UV radiation neutralizes bacteria, viruses, and other microorganisms, preventing their growth and keeping your hot tub water crystal clear.

To reach best results use together with filter system.

## Electric Heaters

3 KW Electric Heater

6 KW Electric Heater

9 KW Electric Heater

The electric heater enhances hot tub versatility, working alongside the wood-fired heater to maintain the desired temperature after initial heating. In winter, it helps prevent water from freezing, ensuring year-round usability and convenience.

## Filter Box

The filter box securely encloses the filtration system, ensuring a clean and organized setup. Made from the same material as the hot tub façade, it maintains a seamless, unified look. The box also provides space for an additional electric heater and a UV-C lamp, allowing easy access to these essential components for maintenance and upgrades.

Spruce Filter Box  
Thermowood Filter Box  
WPC Filter Box

## Gecko Spa System With 3 KW Electric Heater

A complete SPA system with an integrated electric heater and smart control module transforms your hot tub into a fully automated experience. Powered by Gecko, one of the world's leading SPA system manufacturers, the controller allows you to easily manage temperature, massage functions, lighting, and more, ensuring ultimate comfort and convenience.

## Gecko IN.K300

- LCD Screen – Clear display for easy control.
- Temperature Control – Adjust and maintain water temperature.
- Water-Care Modes – Program filtration and maintenance cycles.

## Gecko IN.K1000

- Touchscreen Interface – 4.3" capacitive screen with color display.
- Customization – Control lighting, audio, and accessories.
- Wi-Fi Support – Remote spa management via in.touch 2 module.
